

Patient Details

Name: aewta asdf
Age: 9 Gender: Female

Treatment Recommendations:

- Chemotherapy:** Consider systemic chemotherapy if surgery is not an option.
- Liver Transplant:** Evaluate the patient for liver transplantation due to underlying disease.
- Surgical Resection:** Consider surgical removal of the liver tumor if operable.
- Targeted Therapy:** Assess for targeted therapy options based on tumor characteristics.

Possible Causes:

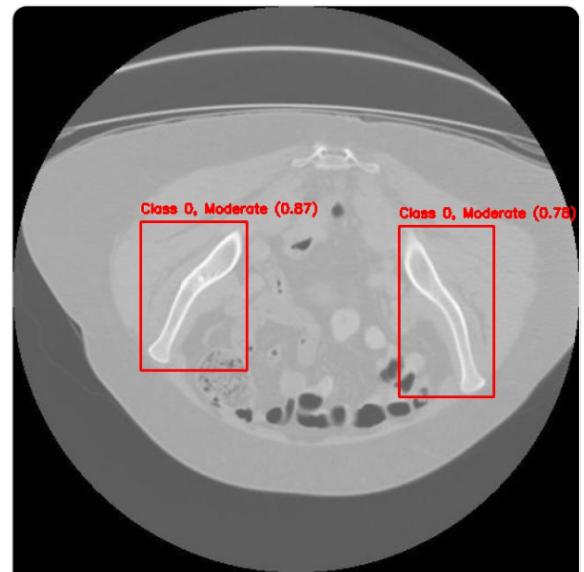

- Autoimmune Factors:** Autoimmune disease can lead to liver damage and tumor development.
- Environmental Exposures:** Consider potential environmental toxins contributing to liver issues.
- Genetic Predisposition:** Family history of liver disease may contribute to risk.

Recommended Blood Tests:

- Complete Blood Count:** Monitor overall health and detect any underlying conditions.
- Liver Function Tests:** Assess liver enzymes and function.
- Tumor Markers:** Evaluate for markers such as AFP (Alpha-fetoprotein) for liver tumors.

Prescriptions:

- Antineoplastic Agents:** For treating liver tumors as part of chemotherapy.
- Immunosuppressants:** If autoimmune disease is contributing to liver condition.
- Pain Management Medications:** For managing discomfort associated with liver issues.

Detected Features:

tumor 1: Area = 1411.29, Size = 31.75mm x 44.45mm, Shape = elongated (vertical), Location = Lower Left lobe

tumor 2: Area = 1445.66, Size = 28.31mm x 51.06mm, Shape = elongated (vertical), Location = Lower Right lobe
