

Patient Details

Name: Rahul Dewani

Age: 2 Gender: Male

Treatment Recommendations:

- 0: Antibiotics: Administer appropriate antibiotics to treat pneumonia.
- 1: Supportive Care: Ensure hydration and provide rest to aid recovery.
- 2: Monitoring: Regularly monitor vital signs and respiratory status.

Possible Causes:

- 0: Viral Infections: Recent viral infections may predispose to secondary bacterial pneumonia.
- 1: Environmental Allergens: Allergies could exacerbate respiratory symptoms.
- 2: Immunocompromised Status: Any underlying immune issues may increase susceptibility.

Recommended Blood Tests:

- 0: Complete Blood Count (CBC): To check for signs of infection or inflammation.
- 1: C-reactive Protein (CRP): To assess the level of inflammation in the body.
- 2: Blood Cultures: To identify any bacterial pathogens in the bloodstream.

Prescriptions:

- 0: Amoxicillin: Commonly used antibiotic for pneumonia treatment.
- 1: Cough Suppressant: To relieve persistent cough associated with pneumonia.
- 2: Bronchodilator: To help ease breathing difficulties if present.
