

## Patient Details

Name: Palak Rajani

Age: 29      Gender: Female

## Treatment Recommendations:

- Chemotherapy:** Evaluate the need for chemotherapy based on tumor characteristics.
- Regular Monitoring:** Implement regular imaging and blood tests to monitor liver function and tumor progression.
- Surgical Resection:** Consider surgical removal of the liver tumor if feasible.
- Targeted Therapy:** Consider targeted therapies if applicable for liver tumors.

## Possible Causes:

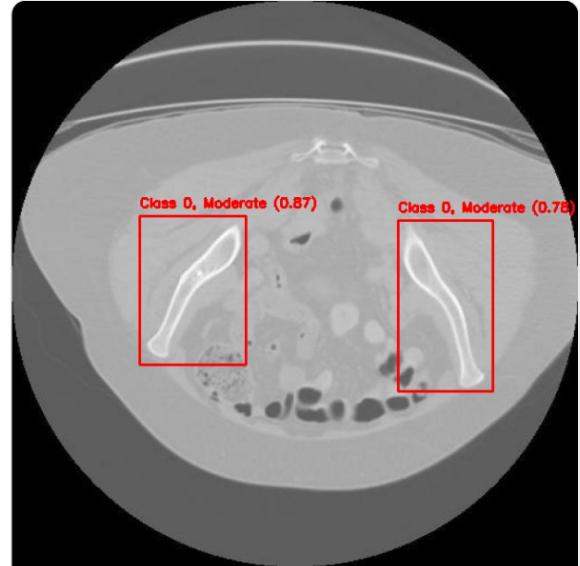

- Autoimmune Response:** The presence of autoimmune disease could contribute to liver tumor development.
- Environmental Factors:** Consider exposure to toxins or infections that may affect liver health.
- Genetic Predisposition:** Family history of liver disease may indicate genetic factors.

## Recommended Blood Tests:

- Complete Blood Count (CBC):** Assess for any signs of anemia or infection.
- Liver Function Tests:** Evaluate liver enzymes and overall liver function.
- Tumor Markers:** Check for specific markers like AFP (Alpha-fetoprotein) to assess tumor activity.

## Prescriptions:

- Antineoplastic Agents:** Used for the treatment of cancer-related conditions.
- Immunosuppressants:** May be needed to manage autoimmune disease effects.
- Liver Support Supplements:** Consider supplements to support liver health.

## Detected Features:

**tumor 1:** Area = 1411.29, Size = 31.75mm x 44.45mm, Shape = elongated (vertical), Location = Lower Left lobe

**tumor 2:** Area = 1445.66, Size = 28.31mm x 51.06mm, Shape = elongated (vertical), Location = Lower Right lobe
