

Patient Details

Name: Alice Brown

Age: 28 Gender: Female

Treatment Recommendations:

- Ablation Therapy:** Use thermal or chemical methods to destroy tumor cells.
- Chemotherapy:** Administer systemic therapy to target cancer cells.
- Monitoring:** Regular imaging and blood tests to assess tumor progression.
- Surgical Resection:** Consider surgical removal of the liver tumor if operable.

Possible Causes:

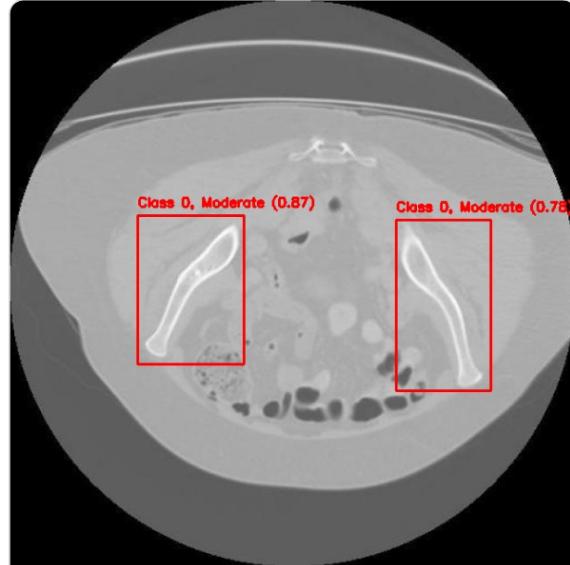

- Alcohol Consumption:** Excessive alcohol intake can lead to liver tumors.
- Chronic Liver Disease:** Long-term liver damage leading to tumor development.
- Diabetes Complications:** Diabetes may contribute to liver dysfunction and tumor risk.
- Obesity:** Obesity is a risk factor for liver disease and tumor formation.

Recommended Blood Tests:

- Alpha-fetoprotein (AFP) Test:** Monitor levels that may indicate liver cancer.
- Blood Glucose Levels:** Monitor diabetes control and related complications.
- Complete Blood Count (CBC):** Assess overall health and detect signs of cancer.
- Liver Function Tests:** Evaluate the health of the liver and detect abnormalities.

Prescriptions:

- Antibiotics:** Prevent infections during treatment procedures.
- Antineoplastic Agents:** Chemotherapy drugs used to treat liver tumors.
- Metformin:** Used to manage blood sugar levels in diabetes.
- Pain Management Medications:** Used to alleviate discomfort associated with liver tumors.

Detected Features:

tumor 1: Area = 1411.29, Size = 31.75mm x 44.45mm, Shape = elongated (vertical), Location = Lower Left lobe

tumor 2: Area = 1445.66, Size = 28.31mm x 51.06mm, Shape = elongated (vertical), Location = Lower Right lobe
