

## Patient Details

Name: Vaishali Chhangani

Age: 45      Gender: Female

## Treatment Recommendations:

- Medication Management:** Manage migraine and hypertension with appropriate medications.
- Radiation Therapy:** Consider radiation therapy if surgery is not an option or for residual tumor.
- Surgical Intervention:** Consider surgical removal of meningioma if symptomatic or growing.

## Possible Causes:

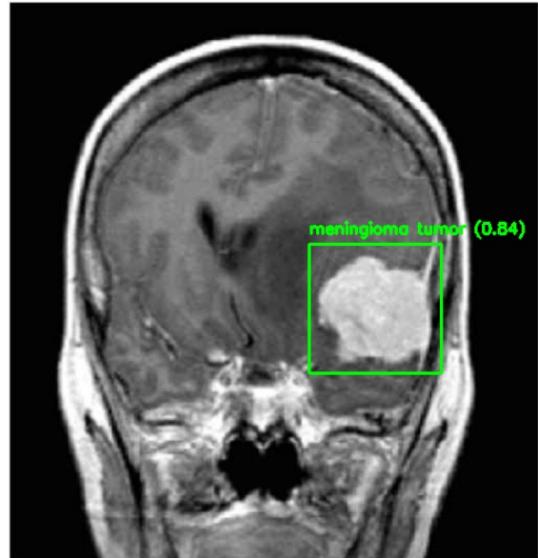

- Environmental Factors:** Exposure to radiation may increase risk of brain tumors.
- Genetic Factors:** Family history may contribute to the development of meningiomas.
- Hormonal Changes:** Hormonal factors may influence the growth of meningiomas.

## Recommended Blood Tests:

- Coagulation Profile:** To evaluate blood clotting function prior to any surgical intervention.
- Complete Blood Count (CBC):** To assess overall health and detect various disorders.
- Electrolytes Panel:** To check for imbalances that may affect blood pressure and overall health.

## Prescriptions:

- Amlodipine:** Prescribed for hypertension management.
- Gabapentin:** Used for migraine prophylaxis and nerve pain management.
- Sumatriptan:** Used to treat acute migraine attacks.

## Detected Features:

**tumor 1:** Area = 2.51 mm<sup>2</sup>, Size = 33.26mm x 32.47mm, Shape = elongated (horizontal), Location = middle right
